the GRASSY KNOLL GAZETTE is published bi-monthly, with occasional dividends between, by CUTLER DESIGNS box 1465 Manchester MA 01944 ... $10/year, $12 overseas printed by Minuteman Press, Danvers, MA .. circ. ca 200 ca. 98 complimentary

3. _____ : YOU CAN'T GET THERE FROM HERE and no one yet has Capt Chun over Sakhalin at 'shootdown'

4. _____ : BC : Before Chronology, PM: Proper Mindset is required to better understand notes (pp 5 & 6)

5. _____ : CHRONOLOGICAL NOTES '79, '80, '81 & '82

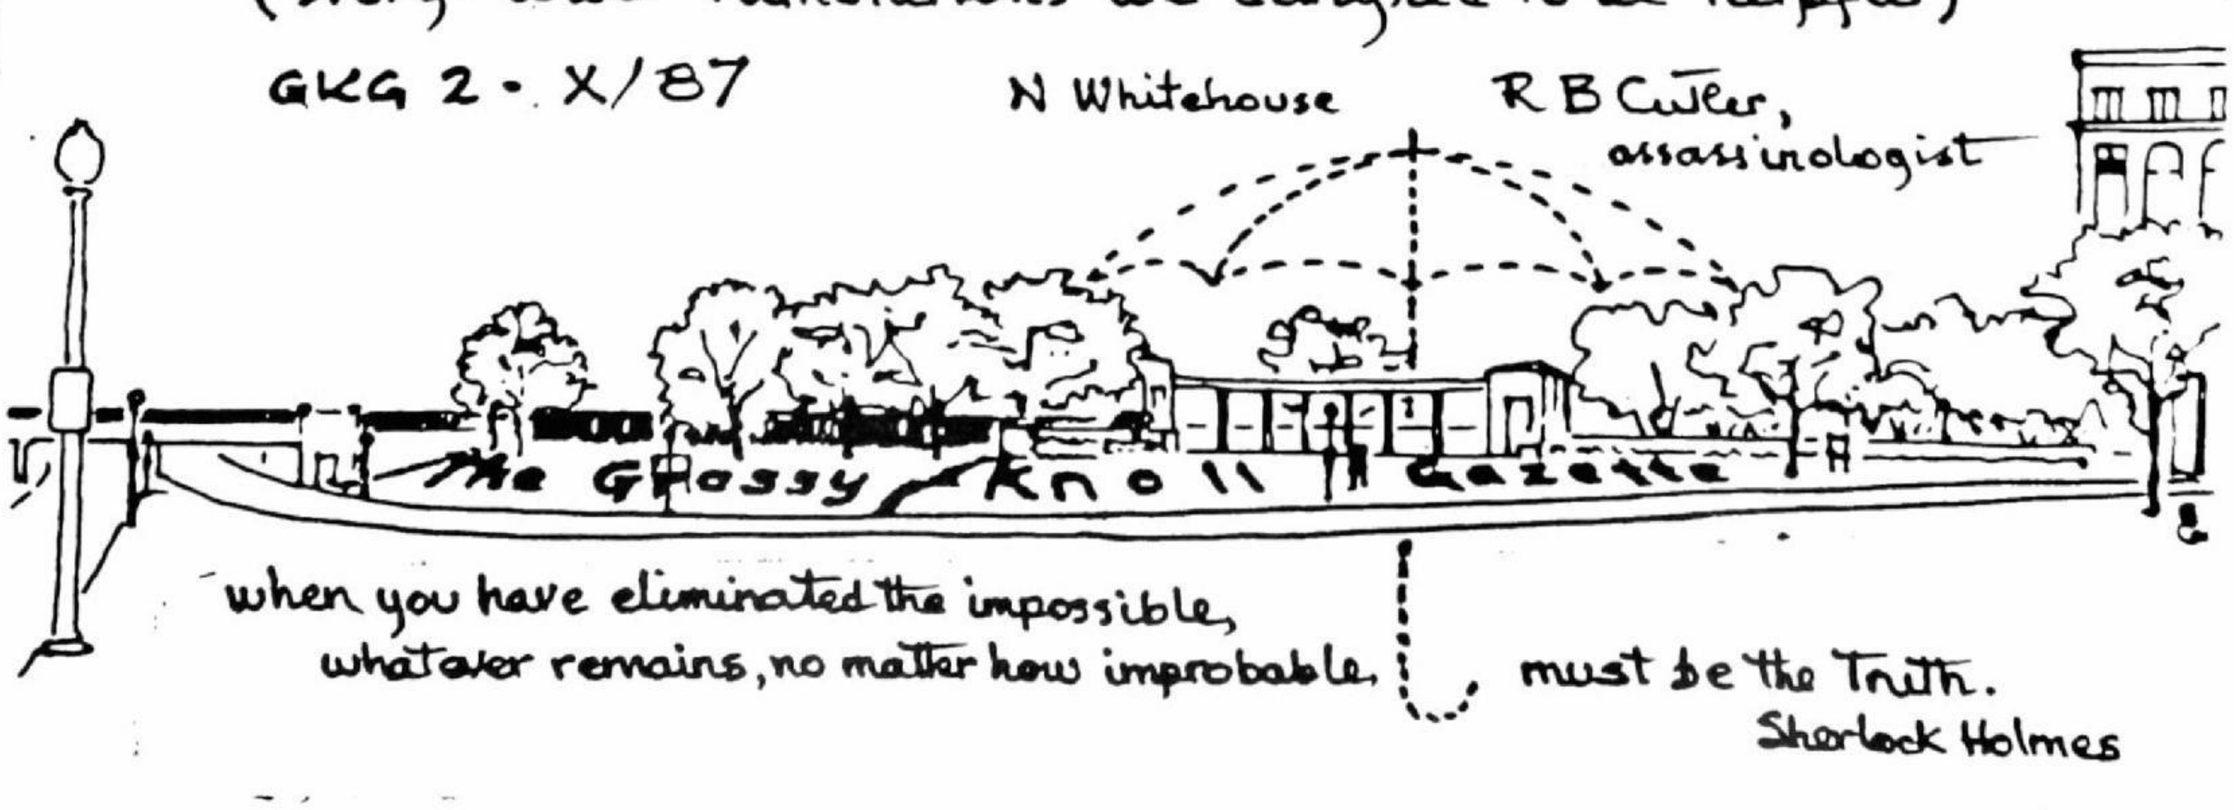
6. _____ : CHRONOLOGICAL NOTES '83 - slanted/tilted toward EXPLO

7. the Nation's Editors among others : ACTION begets REACTION! Newton's 3rd Law : equal & opposite

8. _____ : CIA ALL the WAY ... to HRes 111 w'd best hurry a bit; the Secret Team is doing it's best to canonize its puppet so the next one can slide into 1600 PA Ave under the reflection of ST Ronald's halo ..... Tip O'Neill's, ".... he'd make a great King...." also opens The road to the HRes 111 chopping block. Who Killed KA 007? has faded no further away than Who Killed JFK, MLK, RFK, MJK?

(Ivory-Tower ruminations are designed to be helpful)

GKG 2 - X/87



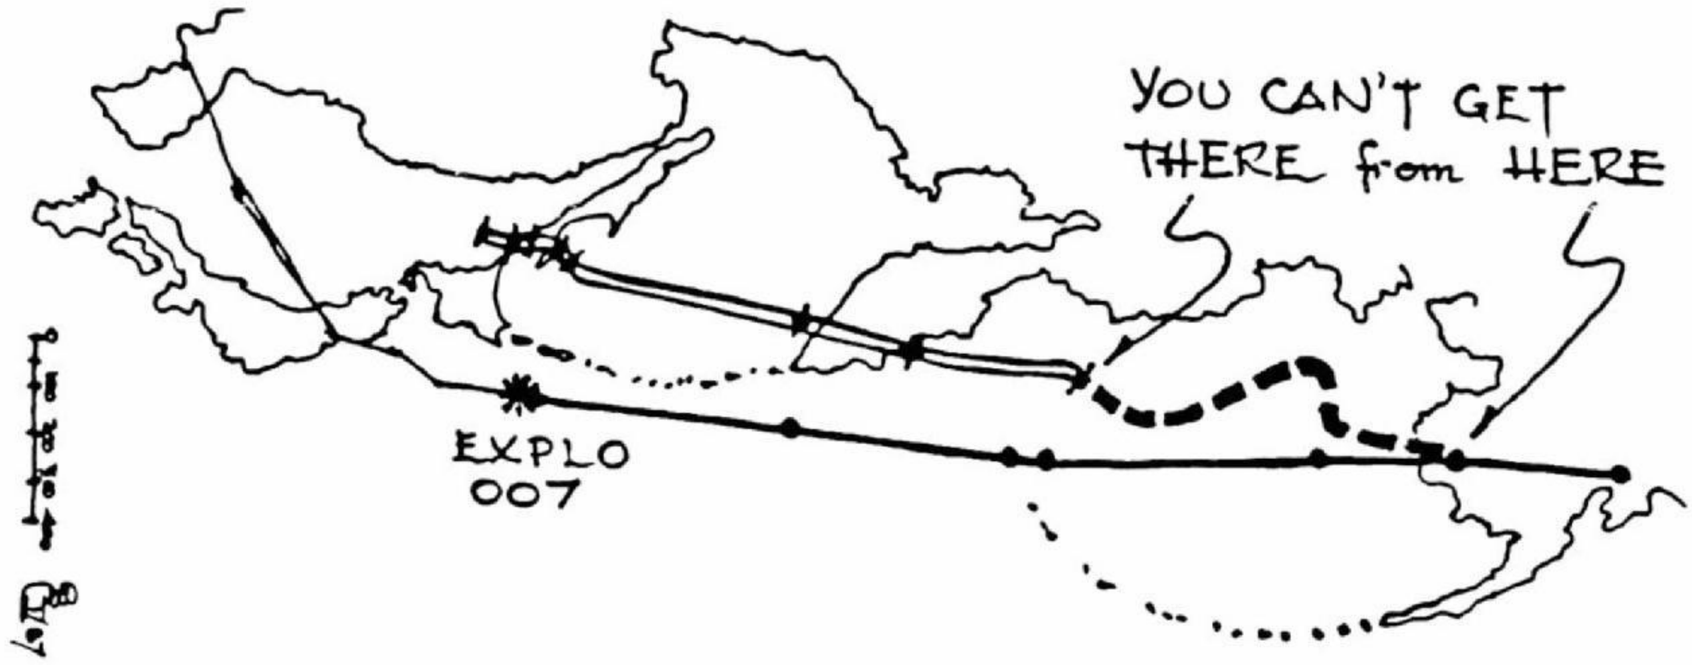
when you have eliminated the impossible, whatever remains, no matter how improbable, must be the Truth.
Sherlock Holmes

YOU CAN'T GET THERE FROM HERE

Four years ago the first of September past, Secretary of State Shultz informed the world that a Russian fighter pilot had fired two missiles at a civilian airliner. Destruction of the target killed all 269 persons aboard.

World reaction to the United State's announcement allowed virtually everyone to relieve themselves of any and all frustrations as indigo dye replaced the air over Foggy Bottom. The Evil Empire eventually was forced to admit its culpability despite the fact that no certified traces were found of crew, baggage, passengers or B-747 in the relatively shallow Sea of Japan.

The fourth "anniversary" saw no media re-runs of KA 007's demise. Only The Nation, promoting David Pearson's upcoming book on the subject, noted journalism's "unanswered questions". Despite the spate of books and articles conjuring how KA 007 managed to overfly Sakhalin, not one author, and Pearson's no exception, has been able to satisfy either himslef or his readers how an experienced flight crew could drift (S-curve)



off course R-20 (straight single line) onto Russia's radar track of its intruder aeroplane (double line)

Human, mechanical and KGB-instigated errors all fail short of transmogrofying KA-007 into that intruder. It is necessary to blot out all Cold War I & II hatred to allow objective consideration of a) the ID of the plane over Sakhalin and b) what the hell knocked KA 007 out of the sky into the Pacific .... and why.

The chronology on the next few pages is slanted toward helping you expose, for yourself, the secret squad that carried out this well-coordinated, covert "mission impossible". Fill in the blank places with ideas of your own that might contribute to enhancing this tilted sequence of events and please let us know so we can add to our crying in the wilderness.

(cont'd)

BC : Before Chronology, PM : Proper Mindset

When you understand the facts you can kick the shootdown habit:

1) the fighter-pilot reports target has strobe light. KA 007's B 747-230B # 20559 was not equipped with strobe light ...

2) at 1821Z the fighter-pilot reports target at 10,000m (33,000ft) ... radar shows it at 32,000 ... Narita gives KA 007 permission to leave 33,000 for 35,000ft ...
at 1823Z, 5 seconds after KA 007 reports reaching 35,000ft, the fighter-pilot reports target at 10,000m (33,000ft) ...
at 1824Z the fighter-pilot launches two missiles...
at 1827Z Narita receives KA 007's last transmission (explosion)...
at 1829Z target flies off the radar scope at 32,000ft, "in the direction of the Sea of Japan" (Tass IX/1/83) ...

3) in none of the Narita/KA 007 transmissions is there any mention of fighters, tracers or missiles whizzing by (Shultz agrees) ...

4) no official traces of crew, baggage, passengers or plane was ever found in the relatively shallow (1,800ft) Sea of Japan ... 19 months later a B 747 was exploded out of the air at 35,000ft ... the black box was recovered in 6,000ft of water as debris littered 40 square miles of the Atlantic ...

5) 4 hours after "shootdown" "CIA-confirmed" press releases first had KA 007 down in the Pacific then "safe on Sakhalin" ... 16 1/2 hours later Shultz told his fairy tale on TV ...

6) in the suit brought by the victims' relatives, both the defense and the prosecution have agreed not to discuss KA 007's over-Sakhalin position ... neither can prove it was ever there ... the relatives are the victims of timidity, coverup and collusion.

The summary below will allow you to fit the following two-page chronology into what we feel is the proper perspective.

1960 a CIA-sabotaged U-2 (and pilot) "landed" in Sverdlovsk, USSR and the Paris Peace Summit was destroyed

1963 the President of the United States was assassinated and Peace in Indo-China was destroyed

1983 a civilian airliner was exploded over the Pacific and the European Peace movement was destroyed (temporarily)

1987 the Guatemala Peace Accords are our best hope of destroying the CIA's authoritative "government"

It will be almost impossible for the bi-partisan/uni-party effort in DC to mind its own business and let Central Americans make Peace.

GKG-4. X/87

CHRONOLOGICAL NOTES.

sources: Barbara Honegger, Christopher Hitchens, Jim Naureckas, RW Johnson, Mark Berry, Johnathan Marshall, Joel Brinkley

'79
V Jerusalem conference on terrorism
VII Sandinista Revelution ousts Somoza
XI 52 hostages seized in US Embassy take-over in Teheran

'80
III Wirthlin, Reagan campaign pollster predicts Carter victory if hostages come home before election
IV ISA, Interagency Support Agency, formed to combat terrorism — Delta Force its active arm
Casey, Reagan Campaign manager, consults with Secord planning CIA's Desert One (fiasco)
IX Carter's negotiations for hostages' return, hampered by Israelis selling arms to Iran (before 4 Nov)
X Reagan Campaign offers arms sales to Iranian emissary in return for hostages' return after election = no "Oct. surprise"
XI Reagan interim Team arranges for hostages' return 20 Jan.

'81, I 52 hostages released
53rd, Taken after Desert One, not released: Reagan, "No Deal"
II 53rd hostage released
III arms shipments start: deal's on
Hashemi's parallel arms shipment start - part of hostage release. (so he says)
Reagan hit fails... FBI's 6 shot firing sequence covers up 7 shot-sounds on ABC, NBC & CBS tapes
XII Natl Intelligence finding establishes Contra support

'82 I Deaver moustraps Allen (out) and installs Clark, NSC Advisor
spring → European Peace Movement & Nuclear freeze gain momentum
Reagan speech in British Parliament announces Project Democracy
V NYC city Peace & Jobs march
Haig resigns
VIII NSC re-evaluates law on covert action
IX Navy's Flexops exercises in North Pacific
XI Democrats gain in elections
XII Boland amendment passed

(so there were arms sales before 1985?)
(how did Carter lose?)

GKG. 5. X/87

CHRONOLOGICAL NOTES (continued)

'83

I NSC : Decision Directive 77. NSC to coordinate Project Democracy's inter-agency efforts

III private support sought for Project Democracy
SDI, Star Wars, announced

IV Europeans openly opposing US missile deployment in the fall
Fleetex. Navy exercises in North Pacific. nine from V - IX
Beirut Embassy bombed. CIA station wiped out

V Boland says law is being broken on Nicaragua

VI Practise amphibious landings on Blue Beach, Okinawa
ISA flying saboteurs into Nicaragua
Corinto harbor mined

VII Summer thaw - Russians pressing for arms control agreement
~~poses~~ difficult imagery for US after two years of arms buildup —
re-election "threatened"
by Peace.

VIII Flight 007. NewYork - Seoul
4 passengers disembark in Anchorage -
plane exploded on course east of HoKKaido in conjunction
with Russian fighter-pilot launching missiles at
intruder aeroplane over SaKhalin ... which flies away

IX Secretary Shultz, after 20½ hrs deliberations, accuses USSR
of shootdown - world opinion follows his lead, (not a peep
out of Casey or Weinberger)

X Clark to Rome to see McFarlane
Clark leaves NSC for Interior, McFarlane heads NSC,
North heads Project Democracy's covert arm.
General Odom assigned to Take ISA apart —
Grenada invasion

XI Casey promises CIA not involved in Project Democracy/Congress
XII authorizes funding

(there's room for your own notes: Did Pilot Chun know about RC-130's penetration?)

GKG·6·X/87

ACTION begets REACTION

.... the Soviets refused to admit that they had shot down the airliner. They said it had left their airspace. They only admitted they had shot it down because we and the Japanese had presented the world with irrefutable evidence... The transcripts of the radio transmissions between the Korean airliner and the air traffic controllers .... clearly indicated that KA 007's pilot had no indication he was flying off course or that he was being pursued by Soviet interceptors .... (George Shultz ... p 159, The Day of the Cobra, J St John)

Someone should ask the Secretary to check on Meese, Clark, Burt, Eagleburger and Casey who started feeding him the "irrefutable evidence" about five o'clock, Wednesday afternoon, VIII/31/83. (Clark found the truth. Realizing he and NSC had been "had", he quit)

.... For most of President Reagan's tenure, the nation's intelligence agencies and some senior officials have been locked in an increasingly bitter conflict over whether intelligence analysis prepared for the President was being distorted to support administration policies .... (Stephen Engleberger, NYTimes, VIII/31/87)

Living on leaks, the press can only hypothesize. When Engleberger reads his paper's copy of Fletcher Prouty's The Secret Team, he'll realize that conflict has been part and parcel of the CIA's Executive Puppettry "Government" since 1947.

.... ongoing political turmoil in the Middle East ensured that terrorism would continue to occupy center stage in the administration's foreign policy agenda. The antiterrorist fervor reached a new plateau after the April 1983 bombing of the US embassy in Beirut -- wiping out the entire CIA station -- .... (p 219, The Iran Contra Connection, by Johnathan Marshall, Peter Dale Scott, Jane Hunter, South End Press,1987)

As in Zapruder film frames 312 - 322, for every action there is an equal and opposite reaction. Four months after the action that killed friends and colleagues in the CIA Beirut station, a calculated reaction exploded a civilian airliner over the Pacific. Intelligance from the scene was distorted into "irrefutable evidence" supporting the administration's anti-terrorist posture. The Moles of the Patomac are loyal. clever, myopic and ignorant.

.... Can it be that the story of Flight 007 is the ultimate case study of what Rear Adm John Poindexter calls "plausible deniability" ? ... (The Nation's editors, IX/5/87)

CKG·7·X/87

CIA ALL THE WAY .... to House Resolution 111

The Nation's editors, having been given the courage to think the unthinkable, the "chilling", by their new publisher, can now contemplate the high crimes and misdemeanours of back-to-back, second-term, Republican ..."presidents" seems hardly the word.

Having almost crossed their Rubicon, they can see Henry Gonzalez on the far shore waving H Res 111, his second shot at impeaching Ronald Reagan. He needs every bit of help The Nation can muster. With "foreign policy" in its usual shambles, the time is ripe.

In 1983 "shootdown" branded the Evil Empire Tops in Terrorism.
In 1984 the Secret Team's super-puppet rode a tidal wave back into the White House. (1972 says history repeats)
In 1987 the same super-puppet is reaching out to the same Evil Empire in fond arms-control summitry. WHY?

1) The USSR is, of course, using the USA's two-faced Iranian bungle as a quiet diplomatic bludgeon.
2) Any middleman worth his salt will sweeten the deal at both ends to ensure compliance. Does the KGB know of bribery in high places in Teheran and Washington?
3) Did the KGB talk to the pilot who destroyed the target? Did the KGB then check the radar data showing the target, the intruder aeroplane, three minutes later, flying off the scope westward at 32,000ft? Has the truth set the KGB free to let the CIA have it?

Ever since Fletcher Prouty evenly balanced the non-flight of KA 007 with the non-flight of CE 399 we have been looking for the motive behind the penetration of Soviet territory. Field-testing radar-jamming and missile-deflecting equipment, the Bondian complexity of coordinating missile-launch and explosion, 360 miles apart, and the all-too-obvious media bonanza is not up to Secret Team sophistication.

The CIA Beirut station loss (thank you Johnathan Marshall) was instantly relateable to EXPLO 007. Lead time was perfect and the anti-terrorist posture, unadulterated CIA.... Flight 007, not Flight 015.

Congressional coverup of NSC involvement in operations long before 1985 leads directly into its Delta Force as the best unit to avenge the Beirut loss. "Delta" heard in KA 007's last transmission may be slim evidence but it beats the hell out of no black box, no suitcase, no body, no B 747 : no corpus delicti.

There'a a crew that flew that RC-130 off the scope westward at 32,000ft; there are radar operators who plotted that flight; there are ground crew personnel who know details of take-off and landing of that flight; there are those who know how the bomb was planted aboard KA 007 and how it was activated and there are the Moles of the Patomac who prepared the Secretary's "irrefutable evidence". In Pearson's article, an acoustical expert's quote sums it up:

... It seems I've been dealing with a bogus tape all along ... ▼
